Update product

Glen Dorner

Delete product

Glen Dorner

Read product/products

Glen Dorner

Cart checkout + invoice + automatically update stock

Glen Dorner

Insomnia for testing endpoints

Glen Dorner

Ideation

Add, Edit, Update and Delete should be on the admin page

Glen Dorner

Admin page implies existance of user login/logout system (probably **dont** need to auth & encrypt users)

Glen Dorner

Login/signup can be the same thing it don't matter

Glen Dorner

4 pages minimum

1. Login/Signup
2. Landing/all products
3. Cart
4. Admin page

Glen Dorner

We can list all the products on the landing page to save time

Glen Dorner

For this same reason we dont need a single product page, we can display everything in cards

Glen Dorner

We can repurpose old code for the cart and admin pages

Glen Dorner
